CA Chorus 4.0  
CA RS 1512 - PTF RO81864 Details

Release	Service	Details
4.0	RO81864	<p>RO81864 M.C.S. ENTRIES = ++PTF (RO81864)</p> <p>METRICPOLLER.H2.DB FILE IS VERY LARGE</p> <p>PROBLEM DESCRIPTION: CA Chorus stores data for users' UI session in an h2 database. Metric panel definitions are stored in the metricpoller.h2.db file. When you add metrics to the metric panel, the metricpoller file will grow. Often you will want to add a large group of metrics at one time -for example all statistics for a system. The metricpoller file will become much larger.</p> <p>SYMPTOMS: If you monitor the size of the h2 database directory, you will see continued growth of the metricpoller.h2.db file.</p> <p>IMPACT: None, as long as the CETJDB filesystem can acquire additional extents when needed, there are no other effects due to the continued growth of the file.</p> <p>CIRCUMVENTION: Delete metrics from the metric panel if they are not needed.</p> <p>PRODUCT(S) AFFECTED: CA CHORUS <span style="float: right;">VERSION: 4.0</span></p> <p>Related Problem: CHRPLT 953</p> <p>Copyright (C) 2015 CA. CA RS 1512 - PTF RO82098 Details

Release	Service	Details
4.0	RO82098	<pre> RO82098  M.C.S. ENTRIES  = ++PTF (RO82098)  SECURED CONNECTION - VULNERABILITY IN TLS V1.0 PROBLEM DESCRIPTION: A security vulnerability exists in Transport Layer Security v 1.0 protocol (TLS v1).  It should not be used for secured connections to CA Chorus. SYMPTOMS: None. IMPACT: If the vulnerability is exploited, a CA Chorus session that should be secure can be read by someone besides the logged in user. CIRCUMVENTION: None. PRODUCT(S) AFFECTED: CA Chorus                                     Version 3.0 CA Chorus                                     Version 4.0 Related Problem: CHRPLT 950 Copyright (C) 2015 CA. Release	Service	Details
4.0	RO84617	<p>RO84617 M.C.S. ENTRIES = ++PTF (RO84617)</p> <p>DATACOM VARIABLE CHANGE IN CONFVARS TEMPLATE</p> <p>PROBLEM DESCRIPTION: The CONFVARS file is arranged so that a required option for customers using Datacom for CMGR and CIA data sources is hidden in the advanced options for the security discipline. This option is often over looked.</p> <p>SYMPTOMS: Auto-configuration generates CETJOPTN(ENVE1M) member with the DBSRV_HOME variable commented out.</p> <p>IMPACT: CA Chorus for Security and Compliance Manager data sources located in CA Datacom/AD databases are not accessible.</p> <p>CIRCUMVENTION: While editing the configuration data set created by ETJICUST, if you use CA Datacom/AD for your CIA or Compliance Manager databases, review the comment in the Security - Advanced Settings for DBSRVHOME.</p> <p>PRODUCT(S) AFFECTED: CA Chorus <span style="float: right;">Release: 3.0 ,4.0</span></p> <p>Related Problem: CHRPLT 964</p> <p>Copyright (C) 2015 CA. All rights reserved. R00096-ETJ040-SP1</p> <p>DESC(DATACOM VARIABLE CHANGE IN CONFVARS TEMPLATE). ++VER (Z038) FMID (CETJ400) PRE ( RO75769 ) SUP ( TR84617 ) ++HOLD (RO84617) SYSTEM FMID(CETJ400) REASON (ACTION ) DATE (15273) COMMENT (</p> <pre> +-----+        CA Chorus                               Version 4.0        +-----+  SEQUENCE   Both before Apply and after Apply                         +-----+  PURPOSE    Preservation of configured files                               +-----+  USERS      If you have used ETJICUST job in CETJJCL library for           AFFECTED   Auto-Config  +-----+  KNOWLEDGE  z/OS or ISPF copy commands                                     REQUIRED  +-----+  ACCESS     Read access to CETJJCL or CETJOPTN library                      REQUIRED  +-----+ ***** * STEPS   TO   PERFORM * ***** Before Applying Update: 1. Copy the sequential dataset(Configuration_ds as indicated in the job) to another location. 2. If you have made modifications in any members in the libraries created by ETJICUST, copy the modified members to another location. After Applying Update: If you have used Auto-Config, rerun the ETJICUST job. This creates the new configuration dataset. Review with the backed-up dataset from the previous run and modify the newly created Configuration_ds dataset and rerun ETJICUST job to bring the changes into effect. This re-creates the output configuration libraries. Review the modifications you have made to the earlier version of ENV* members and modify the updated members as needed. ).</pre>
