CA RS 1512 - PTF RO85831 Details

Release	Service	Details
18.0	RO85831	<p>RO85831 M.C.S. ENTRIES = ++PTF (RO85831)</p> <p>UNLOAD DOES NOT FLAG MULTIPLE PAGE GROUP USAGE AS ERROR</p> <p>PROBLEM DESCRIPTION: The subschema used by the UNLOAD/RELOAD utilities cannot contain areas defined in a page group other than the page group of the segment being processed. The utilities do not indicate an error when the subschema contains areas in multiple page groups leading to possible errors in later steps of the unload/reload process. This restriction is documented in the UNLOAD section of the CA IDMS Utilities Guide.</p> <p>SYMPTOMS: Various errors during the unload/reload process depending on the database definition and content of the database.</p> <p>IMPACT: Users may encounter errors in later steps of the unload/reload process after extended periods of processing resulting in a significant loss of processing time before corrections can be made.</p> <p>CIRCUMVENTION: Run the UNLOAD and RELOAD utilities with a subschema that only defines areas that are defined in a single page group or use the REORG utility.</p> <p>PRODUCTS AFFECTED: CA IDMS Release 18.0 CA IDMS Release 18.5 CA IDMS Release 19.0</p> <p>Related Problem: IDMS 5155</p> <p>Copyright (C) 2015 CA.
